CentropeMAP & CentropeSTATISTICS

Planungsgemeinschaft OST

CentropeMAP is a cross-border, freely accessible information system and geoportal run by the Austrian Planning Association East (PGO). It provides professionals in the fields of planning, administration and regional development with access to key data and developments from the regions of Burgenland, Lower Austria, Vienna, Jihomoravský, Vysočina, Jihočeský, Bratislavský, Trnavský, Győr-Moson-Sopron and Vas.

Statistics at a glance

CentropeSTATISTICS enables users to create their **own analyses** and generate **customised maps and charts**. The harmonised indicators provide a clear, cross-border overview of demographic, economic and social trends. This allows statistical trends to be analysed quickly and enables direct comparisons between municipalities, districts or NUTS 3 regions.

An overview of geodata

CentropeMAP brings together **spatial data and indicators** and presents them in a clearly structured manner on a single portal. The maps are available as Web Map Services (WMS) and can be flexibly integrated into other applications.

Our portal offers

Wide range of topics
socio-demographic indicators

Cross-border Selection
Municipalities, districts, NUTS 3

Own analyses
Linking maps and statistics

Time series
Making trends visible

Population pyramids
Compare age structures
