

The Centrope region at a glance

CentropeMAP/STATISTICS is a cross-border information system and free geoportal of the Austrian Planning Association East (PGO). It gives planners and decision makers a better overview of the Centrope region. The Centrope region consists of adjacent counties and states along the borders between Austria, the Czech Republic, Hungary, and the Slovak Republic. This publication presents selected data from CentropeSTATISTICS to show the development of this cross-border region in the last 10–15 years. Get more information at our website www.centropemap.org.

The location of the CENTROPE region, at the intersection of four countries, is unique in Europe. The two EU capital cities of Bratislava and Vienna, whose agglomerations are separated by a mere 50 kilometres, the cities of Brno and Győr, as regionally significant urban centres, as well as numerous other eminent and attractive cities, are the powerhouses of an economically and culturally expanding European region.

Population in Centrope member countries 2022
