

The absolute number of people younger than 15 years is rising in the Centrope region's average. For example, the Brno region shows a strong increase of people aged younger than 15 years over a large surrounding area.

A remarkable growth of young population can be seen in the Bratislava region with a gain of over more than 45 % during the period 2015–2025. Another significant issue can be seen in Lower Austria where the ratio of younger population decreased despite an overall population gain.

Change of population aged <15, 2015–2025 (percentage points)

decrease > 5

decrease >1 – 5

minor changes (-1 to +1)

increase >1 – 5

increase > 5
